

FLORENCE SAKADE

Revised by KENNETH HENSHALL, CHRISTOPHER SEELEY & HENK DE GROOT

Fourth Edition Revised by JANET IKEDA

A Guide to Reading and Writing JAPANESE

FOURTH
EDITION

A COMPREHENSIVE GUIDE TO
THE JAPANESE WRITING SYSTEM

- Incorporates the most recent changes to the kanji lists prescribed by the Japanese Ministry of Education
- Covers all 2,136 characters in the “General Use” kanji set, with detailed coverage of the 1,009 “Essential” characters
- Full range of character readings and English definitions
- Stroke counts, stroke-order diagrams, and compounds

The Tuttle Story: “Books to Span the East and West”

Many people are surprised to learn that the world’s largest publisher of books on Asia had its humble beginnings in the tiny American state of Vermont. The company’s founder, Charles E. Tuttle, belonged to a New England family steeped in publishing.

Immediately after WW II, Tuttle served in Tokyo under General Douglas MacArthur and was tasked with reviving the Japanese publishing industry. He later founded the Charles E. Tuttle Publishing Company, which thrives today as one of the world’s leading independent publishers.

Though a westerner, Tuttle was hugely instrumental in bringing a knowledge of Japan and Asia to a world hungry for information about the East. By the time of his death in 1993, Tuttle had published over 6,000 books on Asian culture, history and art—a legacy honored by the Japanese emperor with the “Order of the Sacred Treasure,” the highest tribute Japan can bestow upon a non-Japanese.

With a backlist of 1,500 titles, Tuttle Publishing is more active today than at any time in its past—inspired by Charles Tuttle’s core mission to publish fine books to span the East and West and provide a greater understanding of each.

INTRODUCTION

1 Aim

This newly revised edition is designed for students and others who have at least an elementary knowledge of spoken Japanese and want to acquaint themselves with the Japanese writing system. The most significant revisions are the addition of 196 characters, which were added to the *Jōyō kanji* (General-Use Characters) list in November of 2010. The elimination of 5 seldom-used characters now brings the total of General-Use characters to 2,136. The newly added characters reflect an information age where technology now allows characters to be more widely generated and consumed on screens. New characters reflect prefectural names and major cities and a concern with health and parts of the body. Aficionados of Japanese cuisine and culture will see familiar characters for foods (*mochi*, *donburi*, *men*, *senbei*), plants and Japanese cultural artifacts and customs, in particular inclusion of auspicious characters for *tsuru* and *kame*. Previous revisions to the *Jōyō kanji* list had been made in 1981 and 1946.

The highlights of this new edition are the following:

- Radical index for all characters
- Clearly marked characters found on the Kanji List of the AP Japanese Language and Culture Exam (marked with this symbol:)
- Clearly marked characters (marked by level, based on past practice 1, 2, etc.) used for the Japanese Language Proficiency Test (JLPT)

Although proficiency in the Japanese language is not determined by knowing characters alone, this revised edition will provide an excellent study guide for students who wish to increase their reading ability. All characters recommended for the high school National Japanese Exam (NJE) are included.

2 This Book and the Modern Japanese Writing System

2.1 About the Characters Selected

While the *Jōyō kanji* List (hereafter abbreviated to JK List) does not represent an exhaustive list of Chinese characters which the student will encounter in modern Japanese texts, in combination with the two syllabaries (hiragana and katakana) it does nevertheless provide a very sound

basis for reading and writing modern Japanese. In Japanese schools, 1,006 of the more commonly used JK List characters are taught in the six years of elementary school, the balance of 1,130 characters being spread out over the intermediate and high school curriculum. The JK List characters also form the basis of character usage in modern newspapers, though sometimes the Japan Newspaper Association chooses to deviate from the List in some ways.

For writing the names of their children, Japanese today can choose from a corpus of characters consisting of the JK List together with a supplementary list of characters for use in given names. The first such name character list, approved in 1951, consisted of 92 characters, but was expanded considerably in 2004. The current Jinmeiyō Kanji list, which is determined by the Ministry of Justice, includes 861 characters. We do not list these here.

This book is divided into two main sections. Section One presents the 1,006 characters designated by the Japanese Ministry of Education, Culture, Sports, Science and Technology (MEXT) to be taught during the six years of elementary school—termed here “Essential Characters.” The choice of these characters is the result of extensive research and deliberation by the Ministry. For these characters, the editors of this volume have endeavored to give illustrative character compounds that are in common use.

Section Two of this book sets out the 2,136 characters designated for general everyday use (including the 1,006 characters taught at elementary school). In 1946 the Japanese writing system underwent fairly radical reform in the direction of simplification, but the 1970s onwards saw some movement away from what some saw as an over-simplification, and the trend towards use of a bigger range of Chinese characters has been encouraged by the development and popularity from the mid-1980s of word-processors and computers that can handle conventional Japanese text. Despite this trend, the major impact of the orthographic reforms of the late 1940s has meant that the Japanese writing system of today still remains much simpler than it was before 1946.

2.2 How Characters Are Read in Japanese

Typically, each Chinese character has two types of readings—*on-yomi* and *kun-yomi*. The *on-yomi* (*on* reading, i.e., Sino-Japanese reading) is a reading originally based on the Chinese pronunciation associated

INTRODUCTION

with each character, and reflects the fact that the Chinese script was adopted from China the best part of 2,000 years ago, when the Japanese themselves did not have a writing system. Contrasting with the *on-yomi* is the *kun-yomi* (*kun* reading, i.e., native Japanese reading). In some cases, a given Chinese character has several on readings, reflecting different forms of underlying Chinese pronunciation. A given character may also have more than one associated *kun* reading. Context and the use or absence of accompanying kana (*okurigana*) are the pointers as to which reading is appropriate in a given case.

In this book, the majority of the readings set out in the JK List as it appeared in the *Kanpō* (Official Gazette) of 1 October 1981 have been included, but some readings have been excluded, bearing in mind the aim of this book, because they are archaic, obsolescent, or not common (e.g., *nagomu* [to soften] for 和). Also excluded from among the formal readings listed in this book are the sort of common minor—or relatively minor—variations in character readings which are found only in certain environments in compounds. For instance, the character 学 has the *on* reading GAKU, which is truncated to GAK- in the compound 学校 *gakkō* [school, college], the *kun* reading *ame* [rain] of 雨 changes to *ama-* as the first element in compounds such as 雨戸 *amado* [rain-shutters], and the character 合 GŌ is read GAT- in the compound 合点 *gatten* [understanding, consent]. It was considered best for readers of this book to learn such changes gradually as they progress.

In modern Japanese usage there are quite a number of characters which lack either an *on* reading or a *kun* reading. For instance, nowadays the character 糖 [sugar] is employed only for its *on* reading TŌ, while the character 箱 [box] is used only for its *kun* reading *hako*.

2.3 Writing Characters

Firstly, the student should make every effort to practice so as to keep the characters of uniform size in relation to one another. Thus, the 2-stroke character 刀 *katana* should be written within the equal-sized imaginary square or circle as the 15-stroke 論 RON [argument, opinion], and by the same token the element 言 should be written larger when used as an independent character (read GEN, GON, [speech, word]) than when used as a radical / component in a more complex character such as 論 RON above.

Secondly, bear in mind that Chinese characters sometimes consist of just a few strokes, sometimes many, but the characters are always

written according to a set stroke order. Listed below are some principles that will be of assistance with regard to priority in the order of strokes.

1. Top to bottom:

三	→	一	二	三
育	→	宀	育	
築	→	𠂇	築	築

2. Left to right:

川	→	丶	川	川
村	→	木	村	
湖	→	氵	洁	湖

Other rules are:

3. When two or more strokes cross, horizontal strokes usually precede perpendicular ones:

十	→	一	十	
共	→	一	廿	共
末	→	=	乚	末

INTRODUCTION

4. Sometimes perpendicular strokes precede horizontal ones:

田	→	丨	田	田
王	→	丨	干	王
里	→	曰	甲	里

5. Center first, then left and right:

小	→	丨	小	小
承	→	乚	承	承
樂	→	白	泊	樂

6. Perpendicular line running through center written last:

中	→	口	中	
車	→	亘	車	
書	→	彑	畫	書

7. Right-to-left diagonal stroke precedes left-to-right:

人	→	ノ	人	
文	→	ニ	宀	文
支	→	十	步	支

While the above may all seem rather complicated, the student might find solace in the fact that, as noted above, the writing system has been simplified to a considerable extent compared with the past, and has been mastered by many thousands of students having neither native speaker competence in Japanese nor prior background knowledge of the Chinese script.

2.4 Romanization

There are several different systems of representing Japanese using the Roman alphabet. This book employs a slightly modified form of the Hepburn system, this being a system which is widely used and which is based on conventions associated with the spelling of English. The minor modification involves using the letter n rather than m to represent the syllabic nasal ん when the latter occurs immediately before the consonants *m*, *b* or *p* (thus, for instance, *shinbun* [newspaper], not *shimbun*, and *kenpō* [constitution], not *kempō*). Other points to note are:

1. use of a macron to indicate vowel lengthening for *o* and *u*, e.g., *gakkō* [school], *renshū* [practice];
2. use of a hyphen in cases where it is considered that this might facilitate understanding of boundaries between constituent elements in a Japanese word, e.g., *sara-arai* [dishwashing], rather than *saraarai*; and
3. use of the apostrophe ' instead of a hyphen after a syllabic nasal ん, such as *tan'i* [unit] (a word of three short syllables, which in kana would be written たんい) as opposed to *tani* [valley] (a word of two short syllables, written たに in kana).

2.5 Kana Signs and Combinations

The two main sections of this book are followed by a section setting out individual symbols in the hiragana and katakana syllabaries, and illustrations of stroke order for each of those symbols. Each of the two syllabaries evolved and became established over a period of many centuries, thereby becoming cemented as integral components in the modern writing system.

Katakana, which are more angular in appearance than hiragana, are today used first and foremost to represent loanwords of European origin, e.g., パン *pan* [bread] and ビール *biiru* [beer]. Hiragana are used widely and variously elsewhere to represent such elements as

grammatical particles, inflectional endings of verbs, and frequently to represent in writing words which would otherwise need to be written with intricate or uncommon characters such as those for *ōmu* [parrot] (鶲鵠) or for the ken of *sekken* [soap] (石).

For the convenience of users of this book, the final part consists of an alphabetical index of readings for the 2,136 JK List characters.

3 Layout Details

The 1,006 most essential characters are set out in Section One in accordance with the MEXT's division into six grades. These are in running sequence, but note that the grade divisions are:

1–80	=	Grade One	81–240	=	Grade Two
241–440	=	Grade Three	441–640	=	Grade Four
641–825	=	Grade Five	826–1,006	=	Grade Six

Characters within each grade are set out in the traditional “50 sounds” (*gojūon*) order which is commonly used for reference-type works in Japanese, except that the characters in Grade One alone are ordered on the basis of semantic groupings. Each character is typically accompanied by the on reading, then the kun reading and English meaning(s). The context is the best guide as to which reading is appropriate in a given case.

Also included for each of the 1,006 characters is information regarding the total number of strokes (the stroke count) and the set order to be followed in writing individual strokes. In most cases, three examples of character compounds are provided for each of these Essential characters.

Section Two, which presents the total 2,136 General-Use characters, gives them with their on and/or kun readings, and English meanings, but without illustrative compounds. In many cases, however, compounds containing characters which are among the 1,130 “non-essential” characters may be found among the compounds given for each of the 1,006 characters in Section One. The order adopted for listing the corpus of 2,136 characters is that of stroke count (and, within a given stroke count, by radical). So as to avoid undue repetition, each of the 1,006 Essential characters appearing in Section Two is given with the corresponding reference to Section One, to which the reader can refer for details. This symbol ▲ marks each of the 196 newest additions to the JK list.

With regard to the typographical conventions employed in giving readings and meanings for characters, these are explained by means of the example below.

見 KEN¹; *mi(ru)*², to see, look³

¹ On reading in upper case.

² *Kun* reading in lower case italics. Parentheses used to indicate end-syllable(s) to be written in kana (thus, *mi(ru)*, since this word is conventionally written 見る).] Common reading is included though it is not a *kun* reading.

³ English meaning(s) given in regular lower case.

Also note the use of a comma after a single on-reading to indicate that it can be used as a stand-alone word, e.g., “ZA, seat...” (i.e., “za” exists as a word meaning “seat”), as opposed to “U canopy...” (i.e., “u” does not exist as an independent word).

4 Final Notes

This guide is an ideal way to begin a serious study of the Japanese writing system. Other textbooks should be consulted for studies in vocabulary, grammar and culture. A number of textbooks and reference works are available from Tuttle Publishing.

With each revision this guide continues to provide a useful and comprehensive approach to an ever-growing circle of readers and life-long learners. There are many specialists of Japanese who began their study of Japanese with the first version of this guide and fondly keep that original volume, with its familiar orange and black book jacket, on their shelves. My own well-worn copy reminds me of my very first sensei and the joy that learning and now teaching of Japanese brings.

ACKNOWLEDGMENTS

Many thanks to Professor Janet Ikeda for her careful review of the previous edition's text, and her updates and improvements to allow this book to continue as a core reference for today's learners.

The editors of this revised edition respectfully acknowledge the work of the earlier editions carried out by Florence Sakade and her editorial team, work which has been of assistance to generations of students.

Grateful acknowledgment is also due to Calvert Barksdale, Nancy Goh, Tan Cheng Har, Flavia Hodges, Tan Mike Tze, Nathan Burrows, Neil Chandler, Bruce Penno, Paul Eagle, Shozo Tsuji, Yasuko Tsuji, and Kazuko Seeley.

RADICAL INDEX

In this index, the **center column** provides this information:

- All Essential characters are referenced by their character number only.
- All General Use characters that are not Essential characters are referenced by their page number. Page numbers are followed by either “a” or “b” to indicate the left or right column on that page.

The **righthand column** provides the reference number that the *New Nelson Dictionary* assigns to the character.

INDEX OF READINGS

This index contains an alphabetical listing of all Japanese readings given in the body of the book. Note that:

1. On readings are shown in capital letters and kun readings are shown in lower case letters.
2. All Essential characters are referenced by their character number only. For example:
abiru 浴 625.
3. All General Use characters that are not Essential characters are referenced by their page number. These are preceded by the letter “p” and followed by either “a” or “b” to indicate the left or right column on that page. For example: A 亜 p 218a.
4. When readings include okurigana, these are not indicated by parentheses.

—A—

A 亜 p 218a	akinau 商 333	aratamaru, aratameru	ateru 充 p 214a

The best-selling reference work for over 45 years.

Newly revised and updated, this essential companion to the study of Japanese helps you master today's language in its everyday form. Here are all 2,136 characters in the Japanese Ministry of Education's approved "General Use" set, with particular attention paid to the 1,009 "Essential" characters that Japanese children must learn during the first six years of grade school.

Knowing the General Use characters is your key to mastering everyday Japanese—for instance, it will enable you to read any Japanese newspaper.

- ▶ **Essential characters are presented according to the new arrangement by grade, based on their frequency of usage rather than their complexity.**
- ▶ **Numerous examples are given of the kanji compounds and derivatives used to form everyday words in Japanese.**
- ▶ **Special codes indicate the kanji required for the JLPT and AP exams.**

FLORENCE SAKADE was a renowned editor and author of numerous books about Japan's language and culture, including *Origami: Japanese Paper Folding* and *Japanese Children's Favorite Stories*.

JANET IKEDA is Associate Professor of Japanese at Washington and Lee University in Virginia. She served as president of the American Association of Teachers of Japanese, and is currently on the Board of the AATJ. Ikeda is also a member of the U.S.-Japan Council and served on the Japanese American Leadership Delegation (JALD).
